SUMMARY

Dual-degree Computer Science and Data Science student graduating 2027. Ranked 5th of 2,343 in a Kaggle ML competition at IIT Madras, and built a production e-commerce platform that processes live payments end to end.

EDUCATION

Indian Institute of Technology Madras - B.S., Data Science & Applications · CGPA 8.49/10 **2023 - 2027**

University Institute of Technology, RGPV - B.Tech., Computer Science & Engineering · CGPA 8.16/10 **2023 - 2027**

EXPERIENCE

Nakhrali Fashion (Nakhrali Luxury) - Full Stack Developer (Intern, then Freelance) **Aug 2025 - Present**

React 19 · Node.js · Express 5 · PostgreSQL · Razorpay · Cloudflare · Nginx · GitHub Actions | nakhraliluxury.com

- Shipped a live e-commerce platform end to end (**86 REST routes**, 37 PostgreSQL migrations) with **100+ users**, 100+ daily visitors and 100+ orders.
- Eliminated price tampering and duplicate charges via server-side repricing, HMAC-SHA256 checks and DB locks.
- Replaced LIKE table scans with PostgreSQL full-text search (tsvector + GIN index) and indexed admin date-range reports.
- Built admin catalog tools: an SSRF-hardened Amazon/Flipkart importer and fail-safe bulk upload (**50 products/request**).
- Built a live promotions engine (combos, buy-X-get-Y, free gifts) with idempotency-keyed checkout snapshots.
- Migrated the backend from Render to a VPS behind Nginx, PM2 and Cloudflare, with GitHub Actions auto-deploy.
- Fixed **12 of 13 security-audit findings**, including SSRF, duplicate-order and email HTML-injection bugs.

PROJECTS

Idempotent Event Processor - reliable payment-event backend **2026**

TypeScript · Node.js · PostgreSQL · Redis Streams · Docker · k6 | github.com/morningstar0521/Idempotent-Event-Processor

- Achieved **zero lost and zero duplicate events** in 6 Docker chaos scenarios via a transactional outbox and DB idempotency.
- Sustained **200 events/s** for 90 s on 3 workers (18,000/18,000 processed) at **3.78 ms API p95** in local k6 load tests.
- Survived worker crashes and full Redis loss via a reaper and sweeper; added backoff retries and a dead-letter queue.

QuickPark - parking management platform, Best Project Award at IIT Madras **2025**

Python · Flask · Vue.js 3 · SQLAlchemy · Celery · Redis · Docker · AWS EC2 | github.com/morningstar0521/Quick-Park

- Deployed on AWS EC2 with **36 JWT-secured REST endpoints**, role-based access and a 4-service Docker stack.
- Eliminated double booking with atomic compare-and-set and partial unique indexes (old code: 40 bookings on 1 spot).
- Offloaded emails, PDF receipts and reports to 5 async Celery tasks and 2 scheduled jobs; cached 4 endpoints in Redis.

README Intelligence - documentation analysis tool **2026**

TypeScript · Next.js 14 · pnpm monorepo · Zod · Vitest · Playwright · Vercel | readme-intelligence.vercel.app

- Shipped as a web app, npm CLI (v0.1.4) and a CI/CD GitHub Action that fails PRs adding new README contradictions.
- Measured on 59 hand-labelled READMEs: **87.4% F1** on env vars, 77.8% on commands, 69.8% on tech stack.
- Covered the core with **592 tests** plus 10 Playwright end-to-end tests running in CI.
